

Poseta vodećih menadžera UNIQA osiguranju

Visit of leading sales managers to UNIQA Insurance

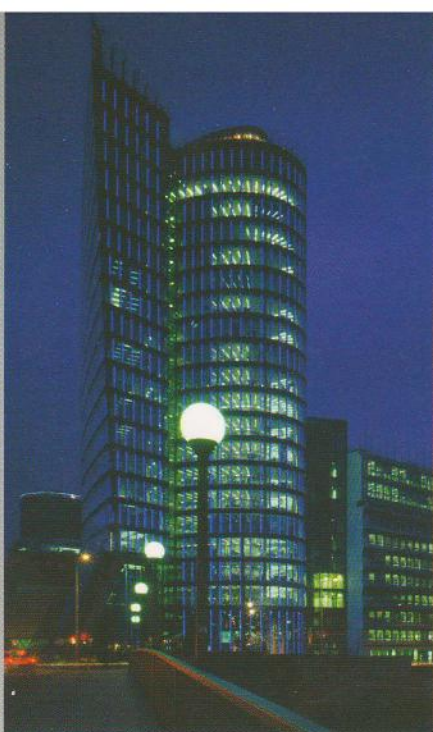

Zadovoljstvo da među prvima borave u Beču i da posete sedište Uniqe imalo je 12 menadžera životnog osiguranja na čelu sa Draganom Vasiljevićem, direktorm prodaje. Ova mala "četa" boravila je 5. jula u UNIQA Tower-u, kao uvertira za nagradno putovanje koje najuspešnije učesnike u aktuelnom takmičenju očekuje krajem septembra.

Po povratku sa puta, naši menadžeri su imali samo reči hvale za srdačnost, toplinu i gostoljubivost svojih domaćina. UNIQA Tower je na sve ostavila izuzetan utisak. Iako je bila reč o prvoj poseti UNIQA-i i Beču, naše kolege su posebno istakle da im je najdraže to što su se osećali kao kod kuće.

Twelve life insurance managers headed by the sales manager Dragan Vasiljević had a pleasure to be among the first in Vienna and visit the seat of UNIQA. This small "company" visited the UNIQA Tower on 5 July as an overture of the prize trip that waits for the most successful participants in the actual competition by the end of September.

Upon return, our managers had only the words of praise for cordiality, warmth and hospitality of their hosts. The UNIQA Tower made an extremely favourable impression on all of them. Although it was the first visit to UNIQA and Vienna, our colleagues particularly pointed out that what they liked best was that they felt as if they were at home.

OSNOVNI PODACI O UNIQA KULI:

Visina kule je 75 metara, ali se prostire i ispod zemlje i to do 35 metara dubine. Kula ima 22 sprata nad zemljom i još 5 pod zemljom. Nosi je 6 masivnih betonskih nosača, a staklo kojim je presvučena ima površinu 31.244 kvadratna metra, što odgovara veličini pet fudbalskih terena. Reč je o "pametnoj" zgradi, jer su tehnološka rešenja takva da se, na primer, žaluzine automatski pomeraju u zavisnosti od jačine sunca, a zbog duple staklene fasade grejanje, hlađenje i provetravanje optimalno funkcionišu. Kula je delo poznatog arhitekta Heinz Neumann-a.

BASIC DETAILS ABOUT THE UNIQA TOWER:

The tower is 75 m high, but it also reaches 35 m under the ground level. The tower consists of 22 floors above the ground and yet another five under the ground. Six massive concrete columns support it. The glass area covers 31,244 sq.m. that is adequate to the size of five football fields. Owing to the technological solutions used, it is a "smart" building. So, for instance, Venetian blinds move depending on intensity of sunrays, and owing to the double glass of the façade - heating, cooling and airing systems work optimally. The tower is the work of a well-known architect Heinz Neumann.
